## About us

**FABRICABLE GROUP** is a family-owned business group comprised of **FABRICABLE**, **CEUCABLE** and **FIBERKABEL**.

Since 1987 we have been manufacturing customised electrical conductors, special cables (security, alarms, fire protection, LiYCY, shielding, etc.), instrumentation cables, as well as providing technical advice on complex projects.

**More than three decades working with electrical, special and instrumentation cables** vouch for **FABRICABLE GROUP's solid track record in the sector** and our involvement with the product.

We supervise every step of the manufacturing and delivery chain. Thus, **we respond immediately** in case of incident: if something is important for our clients, it is capital for us.

Our headquarters are in Barcelona and our factory is located in Sant Vicenç de Castellet (Manresa). **Our sales network spreads throughout Spain, France, the United Kingdom, Latin America**. We currently manufacture cables that comply with a wide variety of standards: **ISO 9001, UNE, IEC, UL, VDE, BS, CSA**, etc.

Our objective is the constant improvement, giving priority to the people who walk beside us and contribute to the innovation and quality demanded by international markets.

Without such a team of professionals and every single one of our clients, none of this would be possible.

Always ready for new challenges

## Mission statement

The companies of **FABRICABLE GROUP** manufacture and distribute custom-made special, instrumentation and electrical cables on an international scale.

Our cables are **viable tailor-made solutions** that meet the specific requirements of each project, which we manage from initial product design phase to order delivery.

**FABRICABLE GROUP** adheres to the principle of **continuous improvement, individual creativity and teamwork spirit**.

## Company vision

At **FABRICABLE GROUP** we work to be among the benchmark companies for our clients, a trusted partner in the manufacture of customised cables and **the comprehensive management of industrial projects**. To achieve this goal, we encourage the specialisation of our professional staff and we have expanded our facilities: we have 4800 m<sup>2</sup> of usable area and we are based in **Barcelona, a historical area of industrial development**.

In the current context of challenges and permanent changes, in which the way we relate to each other and do business is no longer the same, we are confident that **FABRICABLE GROUP** will rise to the challenge and generate value.

## Values

### TRUST

Transparency with our clients

### RESOLUTION

There are no problems but demanding solutions

### DEVELOPMENT

Continuous training and interest in industrial development

### SYNERGY

As a team, we know one thing for sure: we are better together

### RESPONSIBILITY

Commitment to the success of each project, from start to finish

### SERVICE

Our satisfaction is the well-being of our clients

Laboratory for Quality Control at the CEUCABLE factory

## Quality Control

AENOR

## RoHS Compliant

RoHS is an acronym that stands for **Restriction of Hazardous Substances**.

It is a directive adopted by the European Community in February 2003 (2002/95/EC), aimed at **reducing the use of hazardous substances**

**such as lead, cadmium and mercury** (among others) in the construction of electrical and electronic equipment.

In 2011 it was replaced by **Directive 2011/65/EU**, which covers the previous one but extends its scope of application to other products in addition to electrical and electronic products.

**Fabricable Group's** manufacturing processes encourage the recycling of used products and their subsequent re-industrialisation. We strive to incorporate the necessary changes to **make the cable industry as sustainable as possible**.

We have a clean recovery system. The impact on the environment is lower if we reuse the waste from the surplus materials used.

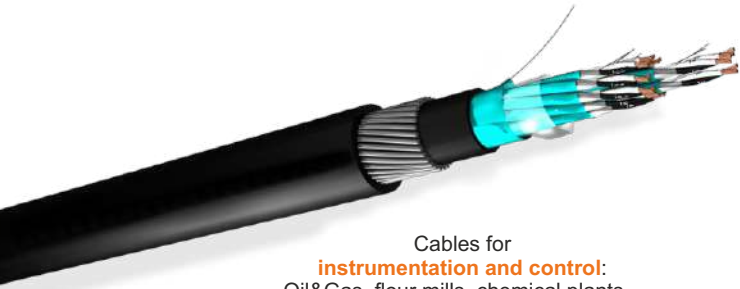

**REDUCE  
REUSE  
RECYCLE**

## Service

Our engineers have the expertise to offer the best solutions on cables. With years of practical experience and technical know-how, **we cover your options and put our knowledge to work for you**.

Cables for **instrumentation and control**:  
Oil&Gas, flour mills, chemical plants...

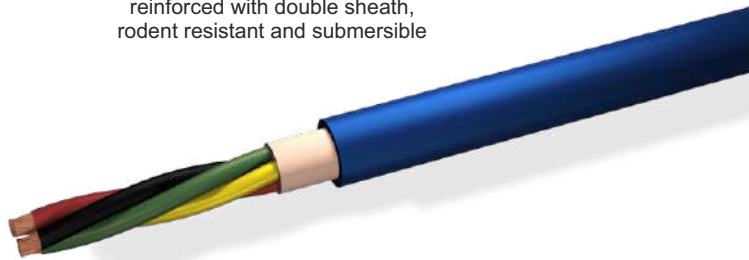

Control cables for **automobile industry facilities**:  
YY, LiYCY, SY, NYSLYO,  
Profibus, CNMO...

Cables for **traffic lights, public lightning**,  
reinforced with double sheath,  
rodent resistant and submersible

Cables for **power companies**:  
Endesa, Red Eléctrica, Iberdrola...

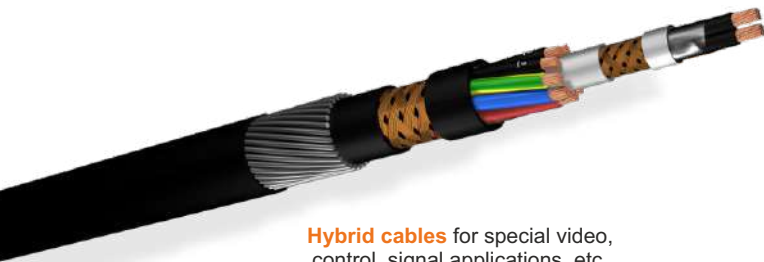

**Network cables, apt for ATEX facilities**:  
submersible, oil resistant, etc.

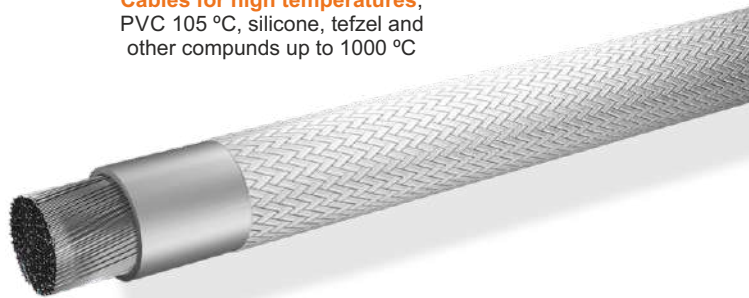

**Extra-flexible cables**:  
cranes, elevators, robotics...

**Cables for high temperatures**,  
PVC 105 °C, silicone, tefzel and  
other compounds up to 1000 °C

**Hybrid cables** for special video,  
control, signal applications, etc.

Cables for **home automation**:  
KNX, Dali...

**Intrusion and fire-protection cables**,  
halogen-free, fire resistant.
